Hart & Vick's Super-Quality Bulbs

The Cream of the Holland Bulb Crop

We import the very choicest bulbs, carefully selected for size and quality, from the crops of some of Holland's leading bulb growers. These are the bulbs we fill your order with. They are as fine as can be grown. The varieties we list have been chosen from the many hundreds grown in Holland with the view of offering you the very best kinds for your home and garden.

Darwin Tulips

These are the long-stemmed, giant-flowering Tulips whose bright colors make such a brilliant display in the garden. Plant them in clumps of six or eight among the shrubbery, in the hardy border and around the house foundation. Let them remain in the ground, they will come up and bloom each spring for several years. In light soil, plant Tulips 6 inches deep; in heavy soil, 4 inches deep.

The numerals following the variety name show in inches how high this kind grows.

We supply individual bulbs of any variety at one-tenth of the dozen price; six bulbs of a kind at the dozen rate; twenty-five at the hundred rate.

Planting Table for Plants and Bulbs

PLANTING. The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting, begin at outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two outer rows, giving more space between each plant or bulb toward the center of the bed. A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by two. For example, an oval 9 feet long by 7 feet wide will require the same number of plants as a circular bed 8 feet in diameter.

Tulip Kaufmanniana.

Rock Garden Tulips

Clusiana. Called the candy stick Tulip because of its alternating bars of cherry-rose and white, and its long, tubular form. The open flower shows a handsome violet disk on a field of pure creamy white. Invaluable for deep pockets in the rockery and for closely planted groups of 12 to 25 bulbs in your border. Blooms fairly early. Dark green, pendulous foliage. Height 10 inches. 90c per doz.; \$6.35 per 100.

Kaufmanniana. Large, creamy white flowers, brilliantly marked with carmine that open flat and are carried on stout stems usually about 6 inches long. This Tulip is very useful. It can be forced indoors, grown in the shady spot of the rock garden and is splendid for naturalizing and for growing under trees. \$1.20 per doz.; \$8.75 per 100.

Tulipa Clusiana.

Hart & Vick's Cottage or May-Flowering Tulips

These beautiful Tulips have now become very popular. Their habit is graceful, the blooms being carried on long, stout stems, and their colors are exceedingly brilliant. They flower at a time when Hyacinths, Daffodils and Early Tulips are over, and before the summer bedding plants are in bloom. They are best planted in borders or between shrubs, not in beds, for they are not through flowering when the bedding plants require setting in. Try a clump of the yellow May-Flowering Tulips beside one of lavender or purple Darwins or Breeders.

The figures following the name denote the height in inches that particular Tulip grows.

AMBROSIA. 25. Superb salmon-orange inside with yellow and green patterned base. Outside color subdued lilac-rose with gay edging of bright coral or luminous apricot. A stunning wide open cup of unusual size on 25-inch stems. This masterpiece has had a meteoric rise during the few years since its introduction. Its delightful perfume is a great asset. \$1.20 per doz.; \$8.75 per 100.

ARGO. 26. This recent introduction has been shown in the Bronx Botanical Gardens, New York, for several seasons, with splendid results. The bed of a few hundred bulbs presented flowers in several stages of coloring, some pure yellow with red stippling at the edges which is the opening color, some deeper yellow with the red stippling spread halfway down the petals and others at the full bloom stage when a warm red glow thinly covers the yellow undertone. Argo is then at its best. We can recommend this interesting variety unreservedly. \$1.10 per doz.; \$7.85 per 100.

BOUTON D'OR. 16. Deep golden yellow; fine for cutting. 55c per doz.; \$3.85 per 100.

CARRARA. 26. Pure driven snow is not whiter, nor does it sparkle like the texture of this new Tulip. Its broad petals fold over into a large round cup, like a fairy snowball. It opens only on very sunny days and then displays its golden yellow stamens which add a perfect little touch of friendliness to its pristine purity. \$1.20 per doz.; \$8.75 per 100.

DIDO. 28. The delightful copper tints of the new Roses can now be had in Tulips. In Dido the body color is a deep coral-pink, edging into light orange, the inside is like costly silk, flaming orange with green and yellow base. Full blown flowers are 3½ inches deep and borne on 28-inch stems. In the newer tints this variety will captivate you. \$1.35 per doz.; \$9.25 per 100.

ELLEN WILLMOTT. 20. Soft, creamy yellow; very fragrant. This is one of the most beautiful Tulips of its color and kind you can plant. We receive many inquiries from people who see it growing, asking its name. 70c per doz.; \$4.85 per 100.

FAIRY QUEEN. 20. A soft rosy lilac flower of most perfect form, broadly margined with clear yellow. We list this Tulip at the suggestion of Garden Club members who place it among the finest that are grown. 65c per doz.; \$4.35 per 100.

GESNERIANA SPATHULATA. 24. Rich crimson-scarlet with a blue base. Especially good in combination with white or yellow kinds. 75c per doz.; \$5.35 per 100.

GRENADIER. 20. Flamboyant orange-scarlet, more orange than scarlet, broad flaring petals forming an elongated flower of attractive design, swaying on a 20-inch stem. Inside disk of bright yellow. A captivating fragrance adds to its value. 65c per doz.; \$4.50 per 100.

INGLESCOMBE PINK. 18. Beautiful rose-pink tinged inside with amber. 55c per doz.; \$3.75 per 100.

INGLESCOMBE YELLOW. 20. Called the Yellow Darwin. A fine, globe-shaped, rich yellow Tulip blooming the same time as the Darwins and planted with them. Pictured in color on page 16. 50c per doz.; \$3.35 per 100.

JOHN RUSKIN. 16. We have added this Tulip to our list this year at repeated requests from friends who have grown and greatly admired it. Certainly this Tulip, whose magnificent flowers of apricot-rose, shaded with mauve and margined with yellow, deserves a prominent place in every garden. 70c per doz.; \$4.85 per 100.

MRS. MOON. 26. Of big value in every planting because of its true deep yellow tint and unusual shape. The petals curve gently outward from the base, then turn in gracefully and continue in a wide outward sweep. This produces a vase shape effect which contrasts beautifully with the various round and oblong cups of other varieties. 95c per doz.; \$6.85 per 100.

MOONLIGHT. 25. Amongst dozens of good yellow Tulips, Moonlight holds a preferred position because of its large oblong cup of clear sulphur-yellow with a dusting as of white talc, which acts as a "bloom", like the bloom of ripe grapes. Full blown, these elegant goblets with their moonlit glow raise the spirit of one's garden to greater heights. Grows best in a semi-shaded corner. 75c per doz.; \$5.00 per 100.

ORANGE KING. 22. Glistening deep orange shaded rose; the inside rich orange-scarlet with a yellow base. Flower of great size, brilliant coloring and delicate fragrance. 60c per doz.; \$4.15 per 100.

PRIDE OF INGLESCOMBE. 23. Pure white Tulip margined with carmine-rose, which suffuses the whole flower as it ages. The petals are pointed and reflexed, and it is altogether a very fine variety. 75c per doz.; \$5.35 per 100.

ROSABELLA. 25. The coloring suggests rose petals dropped on pure driven snow. A lovely light rose laid over purest white which shows brightly towards the edge of the cup. Semi-pointed, slightly reflexed petalage of indescribable elegance. Inside base is pure white, a remarkable feature of this Tulip, lasting flower. This recent introduction is still scarce, but all the growers in Holland are industriously propagating it for an anticipated world demand in the next few years. One of our advance offerings. \$1.10 per doz.; \$8.00 per 100.

ROYAL WHITE. 18. Pure white with a yellow center. 90c per doz.; \$6.35 per 100.

SHANDON BELLS. 18. Creamy yellow, tinged with blush. As the flower ages it turns to carmine-pink. 55c per doz.; \$3.85 per 100.

YELLOW PICOTEE. 20. A wonderfully beautiful flower of creamy yellow with a very fine pink edge to the petals that widens as the flower opens and matures, finally streaking and blushing the petals in a wonderfully beautiful way that makes it one of the most interesting flowers in the garden. 80c per doz.; \$5.85 per 100.
